“Street Maintenance Projects”

CANBY – On August 19, the Canby City Council adopted Ordinance 1317 authorizing a contract between the City of Canby and Eagle-Elsner, Inc. for the 2009 Street Maintenance Projects. The following is a description of the projects. If you have questions please contact Dwayne Barnes, Director of Public Works at 503-266-4021 ext. 282.

Street Maintenance Fee Projects:

The 2009 Street Maintenance Projects were selected based on a Pavement Management Analysis Study completed by Pavement Services, Inc. in March 2007. Public Works Staff took the list of projects detailed in the report to be completed in the first year and inspected them to verify the condition of the segments, as well as the maintenance treatment required. From there, a scope of work was created and the projects were advertised for bid. Below is a list of the street segments included in this summer's project. The total for all the segments is \$500,000 of which all revenue was generated by the monthly street maintenance fee and 3-cent local gas tax. The table below lists the project sections and their respective paving dates. Residents abutting one of the project segments will receive a door hanger notifying them 48-hours prior to the paving. The contractor will begin prep work approximately two days prior to paving each of the sections. Residents will also notice signs at each end of a project segment describing that the project is funded by street maintenance fee/local gas tax revenues. The signs will remain in place for approximately 30 days after project completion after which they will be removed so they can be reused on the following year's projects. As always, the dates are contingent on the weather.
